

Scam Warning

Long-time MAFCS member Sister Ann Gabriel Kilsdonk has brought to our attention a telephone scam to which many people have become victims. A person identifying him/herself as a phone company technician will phone and say that a test on telephone lines is being conducted. To complete the test, the homeowner will be asked to press nine (9) zero (0) and then the pound sign (#) and then hang up. In actuality, what the homeowner has done is to give access to his or her telephone line, which enables long distance calls to be billed to that phone number. ***Please beware*** and don't fall for this scam, which originated from jails/prisons.
